Carpool

Has 3 main functions

DG - Request - A - Ride

Request - A - Ride

Store 1 \$\$\$- 2.1mi

Request

Store 2 \$\$- 3.4mi

Request

Store 3 \$- 5.0mi

Request

When Selected in Request a ride you can select from different stores depending on the how far away it is, the star rating and how cost effective it is

DG - Request - A - Ride

Store selected

Store 2 - 3.4mi

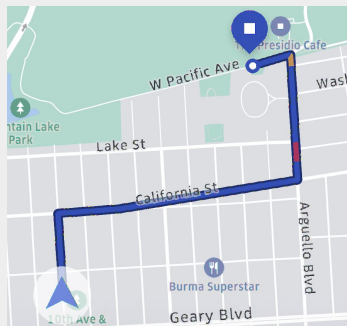

“Driver Name” -

“Car Make and Model”

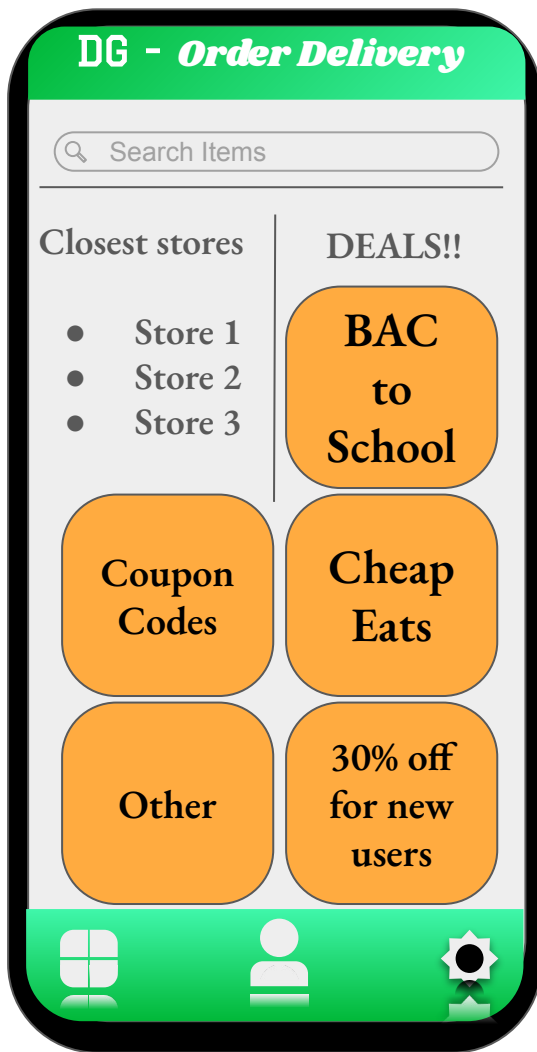

“License plate”

ETA - 10 mins

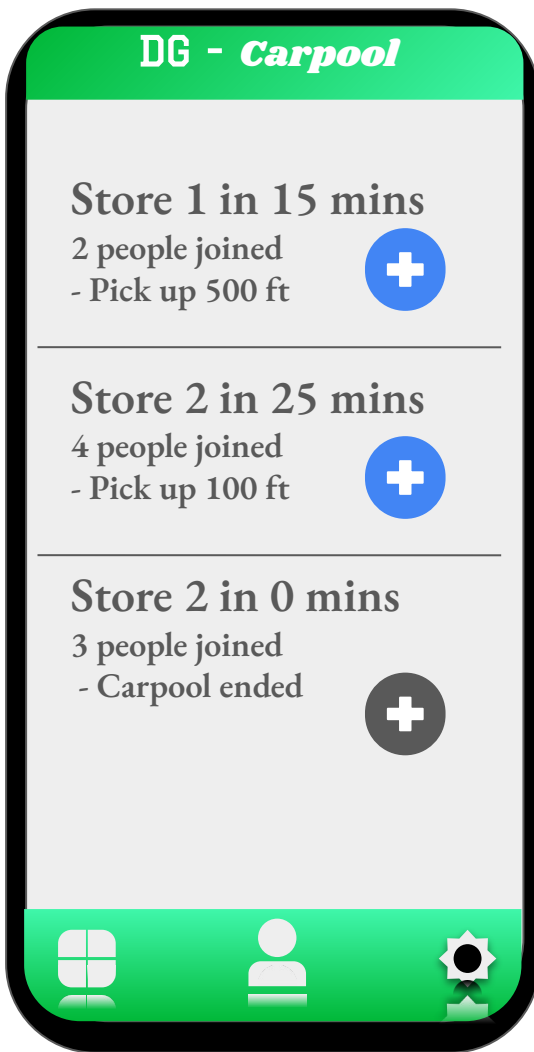

Cancel

When you have the store selected it will find a ride and after the driver has accepted it will show the Driver's Name The Car Make and Model and License plate. Then shows the ETA and the map to how far the driver is from you. You can also decide if you want to cancel or not.

When Order Delivery is selected. There is a search bar where you can search specific items and it shows you the closest stores. Also shows you deals that you can apply to your order.

When Carpool is selected. It shows all the carpools available near you and when and how far away they are.
